

1/2-Day Course

Working at Heights Refresher Course

Fundamentals of Fall Prevention Program

“Falls are one of the major causes of injury and death in Ontario workplaces.” Most of these injuries and deaths have happened because fall protection was either missing or not used.

As of May, 2018, all workers who work at heights are required to successfully complete a Ministry of Labour approved Working at Heights Refresher Training Course if their certificate has gone over 3 years.

This Refresher course will provide workers with the basic knowledge needed to recognize and avoid hazards associated with working at heights and prepare workers to:

- *Explain your rights and responsibilities with regard to working at heights*
- *Work at heights safely and in compliance with regulatory requirements*
- *Select, inspect, and use industry-standard personal fall arrest equipment, including a harness and lanyard*

This Course is designed for workers who use:

- *Aerial Work Platforms*
- *Ladders*
- *Scaffolding*
- *Suspended Access Equipment*
- *or are exposed to any fall hazard*

Ontario Truck Driving School provides training for Working at Heights under the Infrastructure and Safety Association, which has been approved by the Chief Prevention Office.

Wallet Card is issued upon successful completion of this course.

Each participant is required to bring the following items: Photo ID, CSA Approved: Hard Hat, Safety Glasses and Safety Boots. Participants who do not have the required ID and PPE will be removed from the class and must reschedule. No refund will be issued.

Course Fee: \$119 + HST - Onsite training also available
